Successfully access the index/html file and display on the browser

The image shows a web browser window displaying the Santa Clara University homepage. The browser's address bar shows the IP address 127.0.0.1:8080. The page features the university's logo, navigation menus, and a large banner with the text "Go Anywhere From Here" and "Invent the life you want to lead at Santa Clara University." Below the browser window, a terminal window displays the following log output:

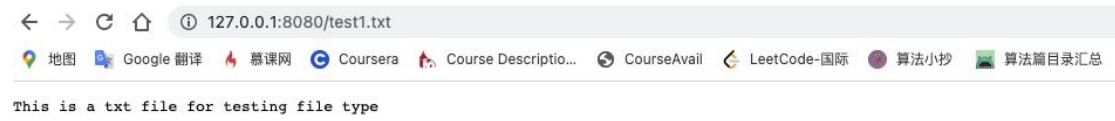

```

Other Info:

In order to create a tarball, I have to delete the test4.txt, which is a permission denied file. If you want to check the 403 Error, you can create a another permission denied file in my submitted directory to check.
